## TECHNICAL SKILLS

**Languages:** HTML5, CSS, JavaScript

**Technologies:** React, node.js, bootstrap, jQuery, MongoDB, MySQL, Redux, GIT, Github

**Other:** Responsive design, Performance testing, Photoshop, Figma

## PROJECTS

---

**Murphy's Music School** | <https://github.com/ColinJhEdwards/murphy-music-school> |

<https://colinjhedwards.github.io/murphy-music-school/>

- Murphy's Music School's mission is to bring their community together through the joys of music by providing a quality music education.
- Designed and implemented pages from concept through deployment using React.
- Utilized multiple packages for styling such as styled-components, framer motion, bootstrap, and material-ui.

**Sweep** | <https://github.com/ColinJhEdwards/Sweep> | <https://colinjhedwards.github.io/Sweep/#/>

- Sweep is an online database full of information related to movies. Users can browse a collection of movies or search for a specific movie.
- Used React to create reusable components.
- Used Axios calls to fetch and display JSON data from multiple APIs.
- Used Redux to manage applications state.
- Created responsive web pages with media queries, CSS grid, flexbox, and bootstrap.

**Socks** | <https://github.com/ashley-ag/Socks> | <https://socks-stocks.herokuapp.com/>

- Socks is a web-based application that allows users to view their current stock units.
- Collaborated with a team of multiple developers to implement features.
- Led the design and front-end development.
- Utilized React/Express/MongoDB to store user information, pull stock data from APIs and create data visualization tools.

## EXPERIENCE

---

**Free Lance Front End Developer** 08/2021 – Present

Inca Wheels - <https://www.incawheels.com/>

- Implemented websites and landing pages from concept through deployment.

- Used frameworks such as React and Bootstrap.
- Used Google Maps API to implement maps feature for specific destinations.
- Used design software such as Figma and Photoshop for editing photos and creating wireframes.
- Collaborated with team members to implement new features and design requests.

**QA Tester / Team Lead** 01/2019 – 10/2020

Nintendo Redmond, WA

- Successfully managed multiple teams consisting of product testers.
- Identified and reported over 100 high quality bugs and errors found in software.
- Consistently recognized for excellent problem-solving skills and leadership.
- Created confident communication with QA, development, and business groups.

**EDUCATION**

**Certificate in Full Stack Web Development:** University of Washington, Seattle, WA

**Bachelor of Arts:** Evergreen State College, Olympia, WA
